

Supplemental Data

Supplemental Table 1. Physicochemical characterization of fDAO and PEG-fDAO

gnu plot	V_{max}	V_{max}
	at pH 8.2	at pH 6.5
D-alanine	29.7	14
D-proline	17.9	6.4
D-phenyalanine	38.1	18.6
D-methionine	19.8	12.3
D-leucine	15.2	7

Supplemental Figure 1 . The excised lung tissues of mice in Exp-1. The lung tissues removed from mice in the PEG-fDAO and nCA groups after 8 days and from mice in the nCA group after 2 days are shown.
