

PCA-Based Vulnerability Index (Quartiles)
Based on Rescaled Weighted PCA Components (0–100)

Source: WorldPop Development Indicators | Method: PCA (3 components, weighted)

Equal-Weight Vulnerability Index (Quartiles)

Computed Using Equal Weights on Rescaled Development Indicators

Source: WorldPop Development Indicators | Method: Equal-Weight Index

Directional Misclassification Map (Quartile-Based)
Signed Difference in Vulnerability Classification (PCA – Equal-Weight)
