Figure 2. PCR amplified 16S rRNA gene. Lane 1: Molecular weight of 100 bp ladder, Lane 3: amplified DNA fragment of ~1500 bp from *Streptomyces cavourensis* strain BA1.

Figure 7a. Scanning electron microscopy images of *E. coli* (magnification 10 000X).

Figure 7b. SEM images of *E. coli* treated with filtrate of *S. cavourensis* strain BA1 (magnification 10 000X).

Figure 7c. SEM image of *K. pneumoniae* untreated (control) (magnification 10 000X).

Figure 7d. SEM image of *K. pneumoniae* treated with the filtrate of *S. cavourensis* strain BA1 (magnification 10 000X).
