

**Table 1:** Comparison of incidence of left shift and neutropenia in unexposed PN vs. PN exposed to CA

	N	Left Shift	Neutropenia
Unexposed PN	29	0	12
CA-exposed PN	27	12	5
p-value		< 0.001	0.08

**Table 2:** PN with a left shift differentiated by CA only and CA with FIRs/funisitis

	N	Left Shift
CA only	13	3
CA with funisitis	14	9
p-value		0.054
