

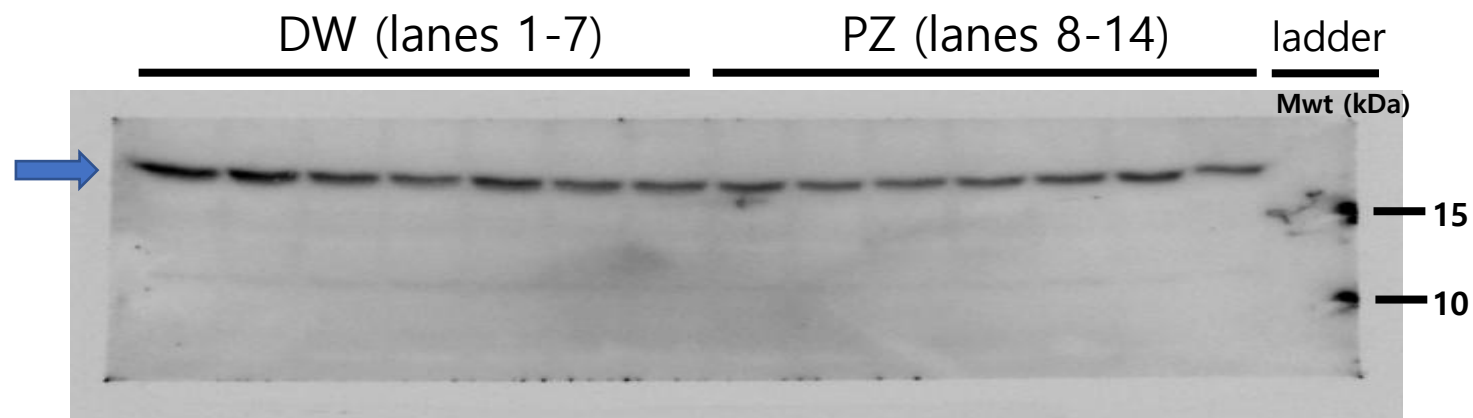

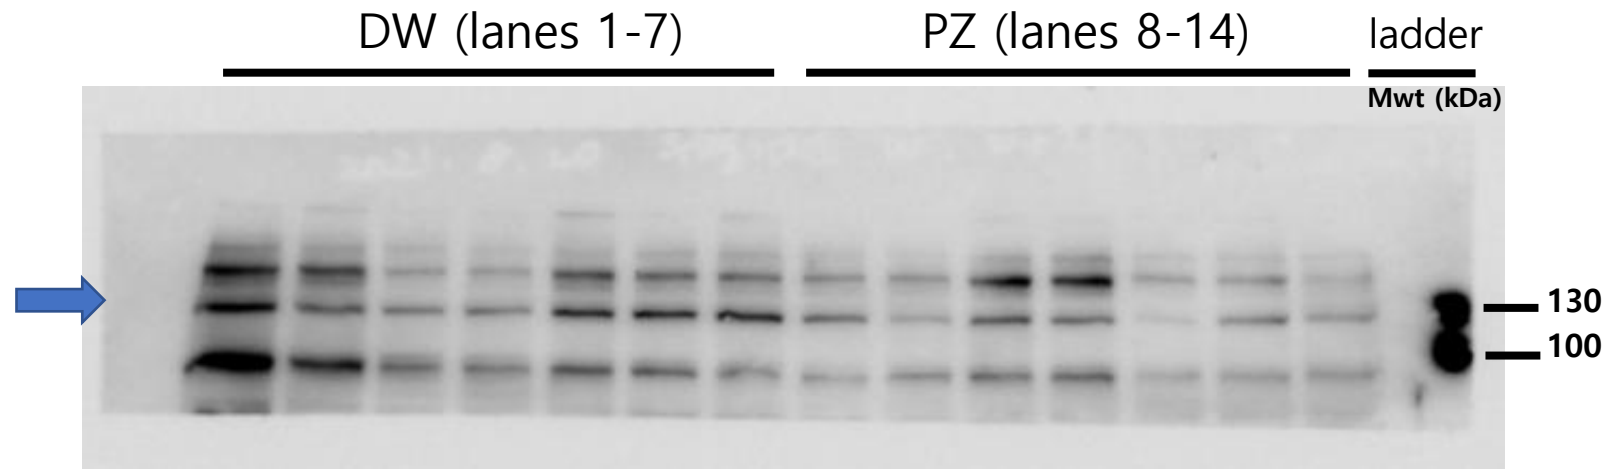

Fig. 4C - IL-1 β (17.5 kDa, original unprocessed blot)

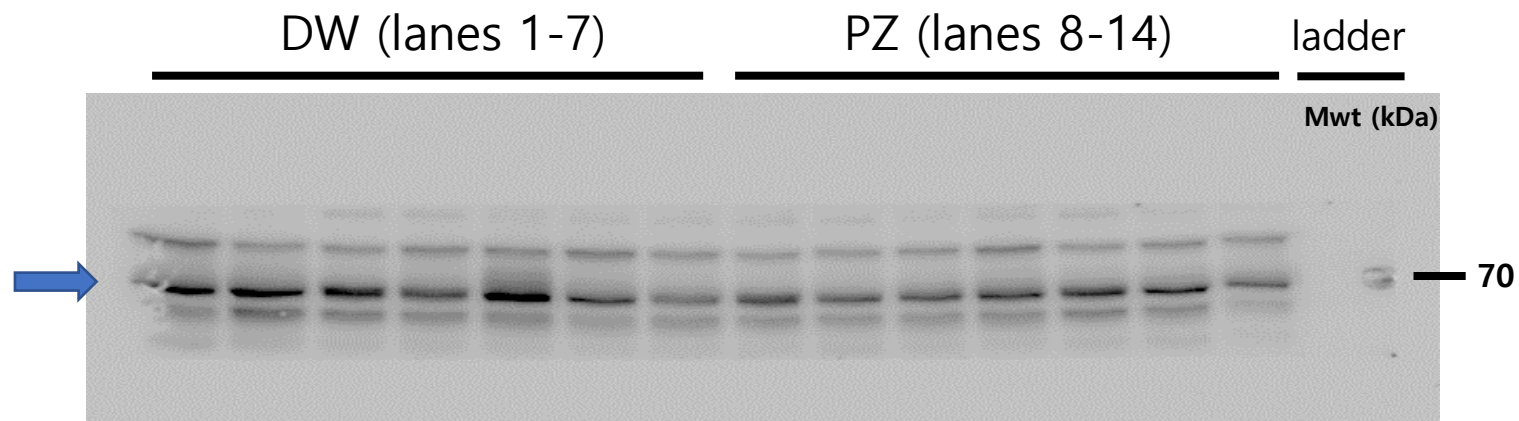

Upper membrane edge not included in the captured image

Fig. 4C - iNOS (130 kDa, original unprocessed blot)

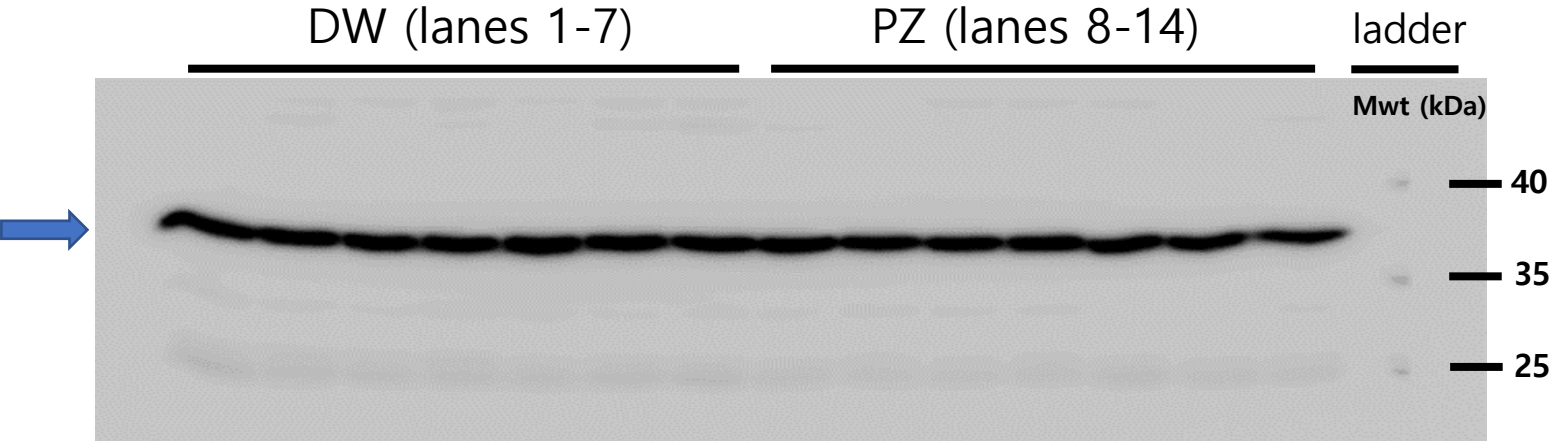

Lower membrane edge not included in the captured image

Fig. 4C - COX-2 (70 kDa, original unprocessed blot)

Upper and lower membrane edge not included in the captured image

Fig. 4C - GAPDH (36 kDa, original unprocessed blot)

Upper membrane edge not included in the captured image

Fig. 5C - MDX (full-length original unprocessed blot)

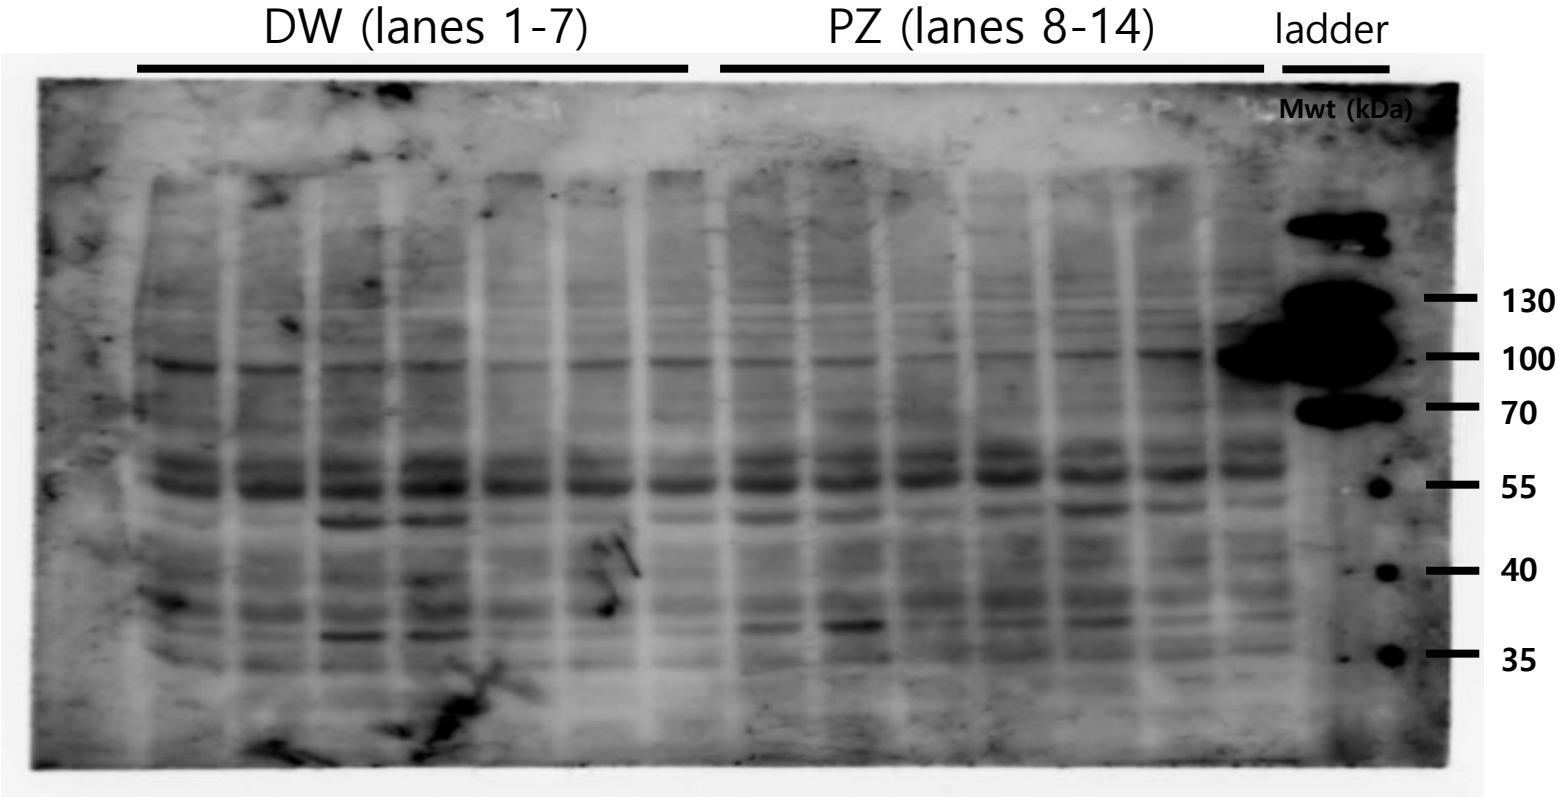

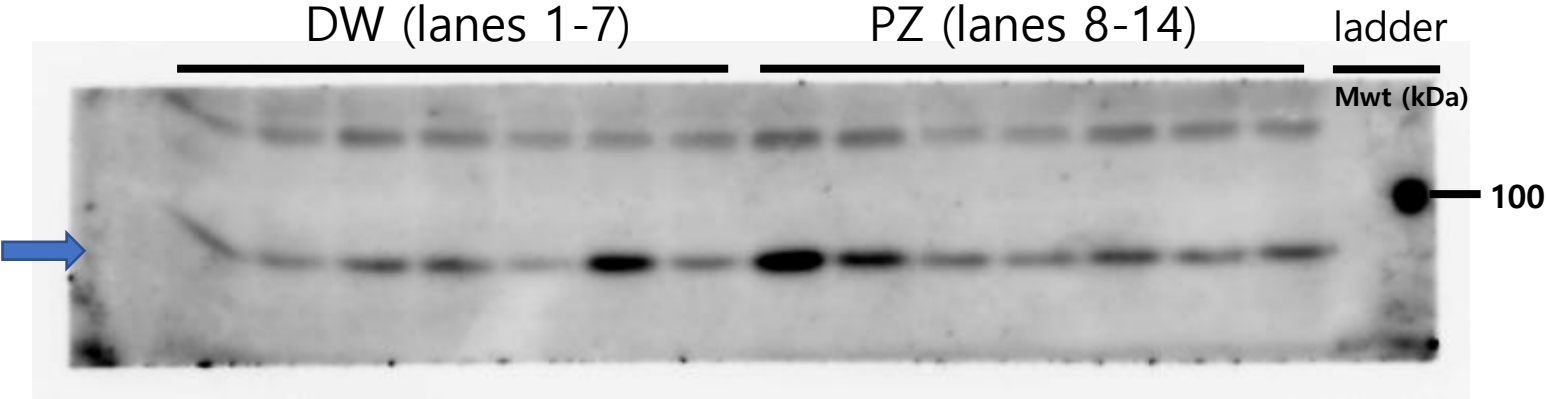

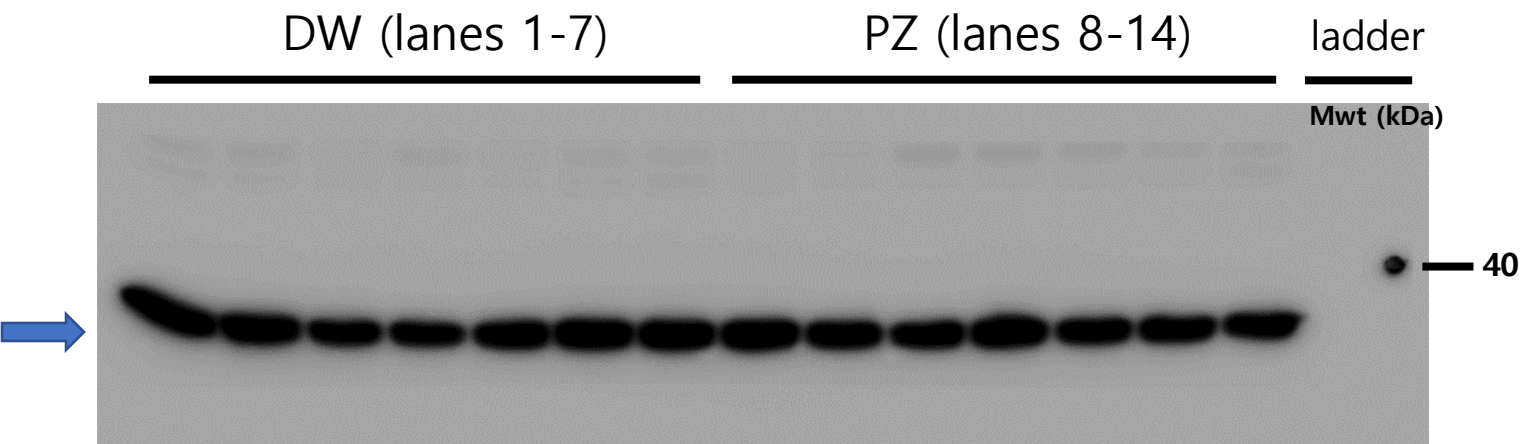

Fig. 5C - GPx (85 kDa, original unprocessed blot)

Lower membrane edge not included in the captured image

Fig. 5C - GAPDH (36 kDa, original unprocessed blot)

Upper and lower membrane edge not included in the captured image
