REF: Effects of an Emotional Release Intervention Studied by Hekalogy on Serum Serotonin Concentrations: A Prospective Pre-Post Study

Dear Dr. Calderón, The Ethics Committee for Research with Human Subjects HSJ-FUCS (CEISH), established by Act No. 2 of September 29, 2006, is composed of ten (10) permanent members. A quorum of more than half is required for ordinary sessions, according to the current bylaws. The committee is certified by INVIMA, according to Resolution No. 2017007903 of February 27, 2017, for the development of clinical research protocols. The IPS Sociedad de Cirugía de Bogotá, Hospital de San José, is authorized by the Health Secretariat for its general operation.

The Ethics Committee for Research with Human Subjects HSJ-FUCS (CEISH) is committed to protecting and respecting the rights of participants in clinical research. To achieve this objective, the committee adheres to all legal and ethical regulations established in the country, including Resolutions 008430 of 1993 and 002378 of 2008 from the Ministry of Social Protection. Furthermore, the committee is guided by the principles and values of the Declaration of Helsinki (Fortaleza, Brazil 2013) and the World Conference on Harmonisation for Good Clinical Practice, guaranteeing the integrity and well-being of participants in health research.

Recording its deliberations in minutes 15 of August 27, 2025, and in response to your communication of August 22, 2025, this committee reviews and APPROVES the aforementioned study.

Please submit the results obtained upon completion of the study to this committee.

In compliance with Resolution 2378 of 2008, please be advised that the bylaws governing this committee, as well as the operational guidelines for its functioning, are available on the website of the University Foundation of Health Sciences for your information and application.

The following members participated in this session:
