

Supplementary figure 8. Ks dot plot analysis of four *Gastrodia* genomes: three *G. elata* forms (A: *G. elata* f. *glauca* (2021), B: *G. elata* (2022), C: dark red *G. elata* and D: *G. menghaiensis*),. Colors represent Ks values of homologous gene pairs in covariant genomic segments, illustrating intragenomic covariance.
