Table S1. Age-specific Stage Distribution of Gastric Cancer Detected Without Screening

Age group	Stage I	Stage II	Stage III	Stage IV
10 - 19	0.224	0.074	0.137	0.634
20 - 29	0.342	0.068	0.124	0.466
30 - 39	0.500	0.094	0.104	0.302
40 - 49	0.577	0.098	0.092	0.233
50 - 59	0.631	0.084	0.094	0.191
60 - 69	0.637	0.077	0.098	0.188
70 - 79	0.659	0.077	0.090	0.174
80 - 89	0.613	0.093	0.096	0.198

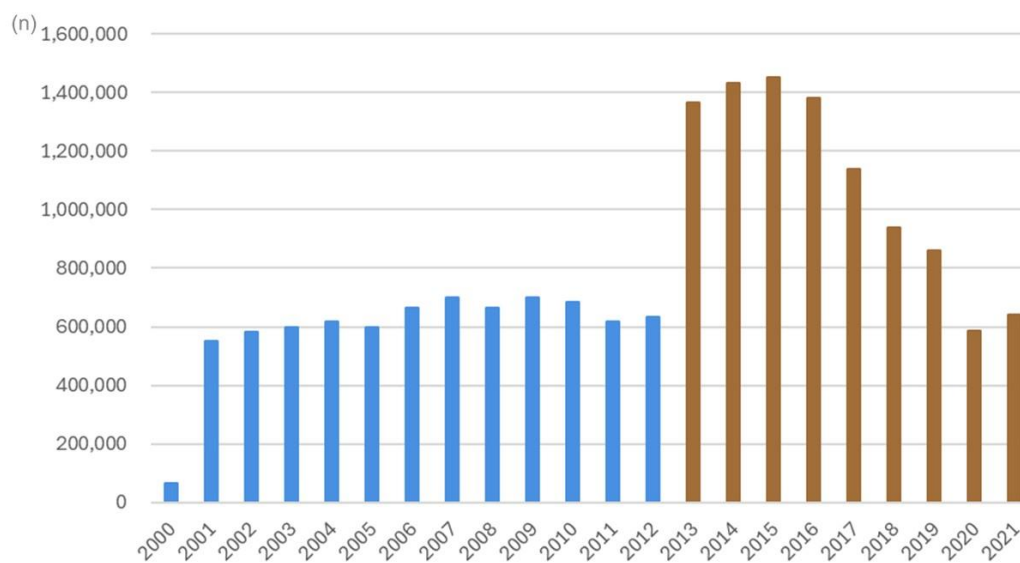

Figure S1. Annual number of *H. pylori* eradications in Japan, 2000–2021.

Eradication for peptic ulcer disease was widely implemented from 2000, followed by a rapid expansion of eradication uptake after national insurance coverage for chronic gastritis was introduced in 2013.
