

Dr. Caroline Wanjara's Tool

Date of data collection :

Form number :

Participant's contact details :

SECTION 1: Demographic Information

Participant ID :

Age :

Residence :

- Moshi Urban
- Moshi Rural
- Hai
- Mwanga
- Rombo
- Siha

Education Level :

- No formal education
- Primary
- Secondary
- Tertiary

Marital Status :

- Single
- Married/Cohabiting
- Divorced
- Widowed

Occupation :

- Unemployed
- Employed/ Self-employed
- Student

Referral case :

- Yes
- No

SECTION 2: Medical and Obstetric History

History of fertility treatment :

- Yes
- No

» ANC Details

Gestation age at booking :

Number of ANC visits :

Maternal height in cm :

Weight at Delivery in Kgs :

BMI is NaN Kg/m²

Hemoglobin level at delivery :

- ≥ 12
- 10.0 - 11.9
- 7.0 - 9.9
- < 7.0

SECTION 3: Labor and Delivery Details**Gestation age at delivery in Weeks :**

Fetal lie :

- Longitudinal
- Transverse
- Oblique

Fetal presenting part :

Cervical dilation on admission :

- ≤ 4
- 4 - 7
- ≥ 8

Type of Labor Onset :

- Spontaneous
- Induced
- Not in labor

Reason for Induction :

Method of induction :

Time of membrane rupture :

- Before labor onset
- During labor
- Not ruptured

Type of membrane rupture

- Spontaneous
- Artificial rupture of membrane

Mode of Delivery :

- Vaginal
- Caesarean Section

If Caesarean Section, indicate the reason :

- Fetal distress
- Dystocia
- Breech presentation
- Maternal request
- Other
- obstructed labor
- non reassuring fetal status
- malpresentation

If Other Specify :

Type of anaesthesia

- General anaesthesia
- Regional anaesthesia

Presence of Birth Companion :

- Yes
- No

SECTION 4: Neonatal Outcomes**Fetal Weight at Birth (in grams):**

» APGAR SCORE**Apgar Score at 1 Minute :**

Apgar Score at 5 Minutes :

- ≤ 7
- > 7

Neonatal Admission after delivery :

- NICU
- P3
- No

Reason for admission :

Breastfeeding initiation within 1 hour:

- Yes
- No

Neonatal Death within 24 Hours :

- Yes
- No

SECTION 5: Maternal Outcomes**Postpartum Hemorrhage (PPH) :**

- Yes
- No

If PPH yes, was it?

- Primary PPH
- Secondary PPH

Hysterectomy :

- Yes
- No

Intensive Care Unit (ICU) Admission :

- Yes
- No

Sepsis :

- Yes
- No

If yes, was it?

- Pyrexia
- Endometritis
- Surgical site infection
- Other

If other, specify :

Maternal Mortality :

- Yes
- No

SECTION 6: Maternal follow up (7 - 14 days)

PPH :

- Yes
- No

Hysterectomy :

- Yes
- No

ICU admission :

- Yes
- No

Sepsis :

- Yes
- No

If yes, was it?

- Pyrexia
- Endometritis
- Surgical site infection
- Other

If other, specify :

Maternal death :

- Yes
- No

SECTION 7: Maternal outcomes at day 28

PPH :

- Yes
- No

Hysterectomy :

- Yes
- No

ICU admission :

- Yes
- No

Sepsis :

- Yes
- No

If yes, was it?

- Pyrexia
- Endometritis
- Surgical site infection
- Other

If other, specify :

Maternal death :

Yes

No

SECTION 8: Additional Information

Any other complications or observations during delivery or peuperium?
