

Supplementary Material 2. English version of the questionnaire

Pre-session

Pre-session Questionnaire on Surgical Illustration

Please tell us about your experience and confidence level.

- The data you provide will be handled as anonymous data and will not include personally identifiable information such as your name or student ID number.
- The results of this questionnaire may be used for conference presentations and/or academic publications after appropriate institutional ethics review and procedures, as needed.
- Participation is voluntary, and whether or not you respond, as well as your responses, will not affect your grades in any way.
- Estimated time required: approximately 2 minutes.
- You may stop answering at any time. If you stop before submission, your responses will not be sent and no data will be collected.
- Because this questionnaire is collected anonymously, once responses are submitted (finalized), it may not be possible to identify which response is yours. Therefore, if you later request withdrawal, it may be difficult to delete or exclude only your specific data.

* 必須の質問です

We would like to ask whether you agree to participate in this questionnaire-based * study.

If you agree, please click the "I agree" button below and proceed to the subsequent survey questions.

I agree

What is your current year of study? *

- 1st-3rd year
- 4th year
- 5th year
- 6th year

Have you ever drawn a gastrointestinal reconstruction diagram by yourself? (4-point ordinal scale) *

- Never
- Once during class
- Voluntary self-study
- Multiple times during training or practice

How confident are you in drawing explanatory surgical anatomy diagrams (e.g., gastrointestinal reconstruction diagrams and organ relationships)? (5-point Likert scale) *

- Not confident at all
- Slightly confident
- Moderately confident
- Very confident
- Extremely confident

How important do you think the ability to produce explanatory diagrams of surgical procedures and organ anatomy is for physicians and medical students? (5-point Likert scale) *

- Not important at all
- Slightly important
- Moderately important
- Very important
- Highly important

How motivated are you to learn to draw explanatory diagrams of gastrointestinal reconstruction and organ anatomy? (5-point Likert scale) *

- Not motivated at all
- Slightly motivated
- Moderately motivated
- Very motivated
- Extremely motivated

I agree

At the end of the session, how important do you think the ability to produce explanatory diagrams of surgical procedures and organ anatomy is for physicians and medical students? (5-point Likert scale) *

- Not important at all
- Slightly important
- Moderately important
- Very important
- Highly important

Do you feel that your ability to draw explanatory diagrams of gastrointestinal reconstruction and organ anatomy improved through this session? (5-point Likert scale) *

- Strongly disagree
- Disagree
- Neutral
- Agree
- Strongly agree

At the end of the session, how confident are you in drawing explanatory surgical anatomy diagrams (e.g., gastrointestinal reconstruction diagrams and organ relationships)? (5-point Likert scale) *

- Not confident at all
- Slightly confident
- Moderately confident
- Very confident
- Highly confident

Overall, how satisfied were you with this session? *

- Not satisfied at all
- Slightly satisfied
- Moderately satisfied
- Very satisfied
- Highly satisfied
