

Table 3. Characteristics of the GOLD diabetes enhanced monitoring pathway (n=172)

Cancer treatment cycles under DP supervision, median [Q1-Q3]	3 [1-5]
	range 1-15
Number of phone calls made (n=109), median [Q1-Q3]	5 [2-7]
	range 0-21
CBG readings (n=135) in mmol/L, median [Q1-Q3]	8.53 [7.65-9.86]
CBG AM readings (n=132) in mmol/L, median [Q1-Q3]	7.43 [6.54-8.46]
CBG PM readings (n=136) in mmol/L, median [Q1-Q3]	9.81 [8.44-11.42]
Highest CBG reading (n=138) in mmol/L, median [Q1-Q3]	15.00 [12.10-18.70]
Referred to diabetes team, n (%)	16 (9%)
Referred from diabetes team, n (%)	11 (6%)
Supported by diabetes team with clinical advice, n (%)	18 (10%)
Diabetes advice provided to the patient, n (%)	157 (91%)
New diabetes medication intervention needed (n=160), n (%)	52 (34%)

Abbreviations: AM= morning time; CBG=capillary blood glucose; DP= diabetes pathway;

GOLD=geriatric oncology liaison development; PM=evening time
