

STROBE Statement—Checklist of Items for Observational Studies

Manuscript Title: Effectiveness of Combined Fascial Plane Blocks for Postoperative Pain in Gynecologic Cancer Surgery: A Prospective Observational Study

Item	STROBE Recommendation	Reported on Page No.
1	Study design indicated in title/abstract	Title page; Abstract (p.1)
2	Scientific background and rationale explained	Introduction (p.2–3)
3	Specific objectives stated	End of Introduction (p.4)
4	Study design presented early in paper	Methods (p.5)
5	Setting and location described	Methods 2.1 (p.5)
6	Eligibility criteria described	Methods 2.2 (p.5)
7	Study Groups	Methods 2.3 (p.5-6-7)
8	Outcomes clearly defined	Methods 2.4 (p.8)
9	Study size explained (power analysis)	Methods 2.5 (p.9)
10	Potential sources of bias addressed	Methods; Discussion (p.3; p.9–10)
11	Handling of quantitative variables explained	Methods 2.5 (p.9)
12	Statistical methods described	Methods 2.5 (p.9)
13	Participant numbers at each stage reported	Methods 3 (p.10)
14	Descriptive data presented	Table 1 (p.11)
15	Outcome data reported	Tables 2–3; Figure 4 (p.12–13; p.15)
16	Main results with precision (p-values)	Results (p.12–13-14)
17	Key results summarized	Discussion (p.18)
18	Limitations discussed	Discussion (p.17-18)
19	Interpretation consistent with results	Discussion (p.16–17)
20	Generalisability addressed	Discussion (p.18)
21	Funding information provided	Declarations (p.19)
22	Ethics approval and consent described	Declarations (p.19)
