

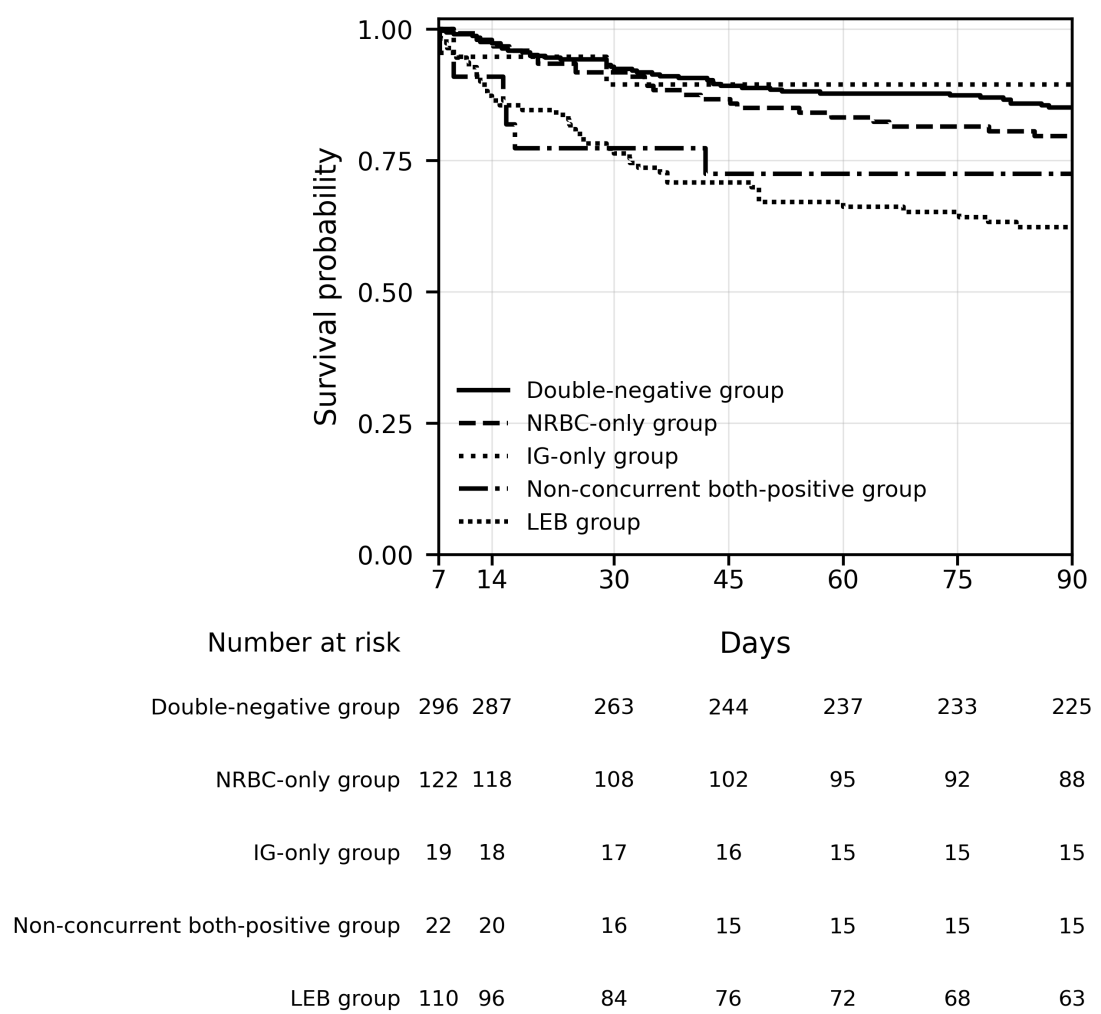

Figure. S1 Kaplan–Meier 90-day survival from the day-7 landmark by five-group classification.

Patients who survived until day 7 in the ICU were included in the study. Time zero was ICU day 7 (day-7 landmark), and patients were followed up until ICU day 90 (censored at day 90). The groups were defined as described in Fig. 1. Tick marks indicate censoring. Numbers at risk are shown at days 7, 14, 30, 45, 60, 75, and 90.

IG, immature granulocytes; NRBC, nucleated red blood cells; LEB, leukoerythroblastosis.
