

Molecular Pathology Test Report

Tongji Hospital, Tongji Medical College, Huazhong University of Science and Technology

Molecular Pathology No: MF24-00507

Name: Empty(pretect the privacy of the patient)

Gender: Male **Age:** 58 years **Outpatient No:** Empty(pretect the privacy of the patient)

Referring Hospital: Xiaogan Central Hospital

Referring Department: Pathology Consultation Center **Date Received:** 2024-05-23

Test Sample No.: Empty(pretect the privacy of the patient)

Pathological Diagnosis: Undetermined

Test Item: MDM2 COPY FISH

Sample Material: Paraffin-embedded tissue

Test Method: Fluorescence In Situ Hybridization (FISH)

FISH Signal Distribution: Clustered distribution

Cells Counted: 50

Test Results:

Amplification of the MDM2 gene was detected.

(This test utilized the MDM2/CEP12 FISH dual-color gene amplification probe)

Report Date: 2024-05-27
