

Table 1. Demographic characteristics (n = 95 patients) and underlying cardiac or pulmonary disease at the time of TAcx collection (n = 196 TAcx).

| Demographic characteristics, n = 95 patients. | |
|--|------------|
| Male, n (%) | 50 (53) |
| Female, n (%) | 45 (47) |
| Race, n (%) | |
| Black or African American | 62 (65) |
| White | 23 (24) |
| Other/Not Disclosed | 10 (11) |
| Hispanic, n (%) | 6 (6) |
| Median estimated gestational age at birth in weeks (IQR) | 27 (25-35) |
| Birthweight, n (%) | |
| < 1000 grams | 48 (51) |
| 1000 – 1499 grams | 9 (9) |
| 1500 – 2499 grams | 15 (16) |
| ≥ 2500 grams | 23 (24) |
| Underlying cardiac or pulmonary disease at the time of TAcx collection, n = 196 TAcx. | |
| Chronic lung disease of prematurity, n (%) | 89 (45) |
| Pulmonary edema, n (%) | 44 (22) |
| Pulmonary hypertension, n (%) | 94 (48) |
| Congenital heart disease, n (%) | 118 (60) |

| | |
|--------------|----------|
| Other, n (%) | 116 (59) |
