Cropped images of EpoR

Full blot images of EpoR

Supplemental figure. Full uncropped membrane images for the Western blot data in Figure 5C. The original, uncropped membrane images used to generate the cropped Western blot panels for EpoR and GAPDH in Figure 5C are presented. For each target protein, the full-length blot is displayed directly to the right of its corresponding cropped panel, with the region of interest and molecular weight marker locations indicated.
