

Supplementary Materials

Manuscript Title:

Climate-induced patterns of activity and nest conditions select for genes associated with growth and maturation in a widespread lizard species

Name	Content
Table S1	An Excel file containing the table with information for the samples used in this study.
Table S2	An Excel file containing a table with the output of the biophysical models for all fourteen of our study sites.
Table S3	An Excel file containing a table with the output of our comparisons of R^2 distributions between our candidate SNPs and randomly generated SNP datasets.
Table S4	An Excel file containing two tables that show all of the genes found in significant linkage with genes that significantly enrich for KEGG terms.
Supplemental Figures	A PDF file that contains supplemental figures one through five. Figure captions contained in the file explain each supplemental figure in more detail.
