

**Supplementary Data S2: Seismic record section, travel-time fitting, and ray-tracing figures of profile NoMelt.**

**Captions:** Seismic record section, travel-time fitting, and ray-tracing of each station in profile NoMelt. (a) Calculated travel-time superimposed on seismic record section. The red dots mark the calculated refraction arrivals while the blue dots show the calculated reflection arrivals. Pg: Crustal refraction wave; PmP: Moho reflection wave; Pn: Upper mantle refraction wave. (b) Raytracing superimposed on velocity model. Station number is shown as bold black above the station. Model plotted as in Fig. 2.
