Supplemental Figure 1. Age distribution of adults dying with cutaneous malignant

3

melanoma compared with the general adult decedent population, United States, 2003-2019.

Supplemental Figure 2. Place of death by age group among adults dying in the general adult decedent population, United States, 2003-2019. Outpatient/emergency room deaths and non-displayed place-of-death categories, comprising medical facility dead on arrival, other, and place of death unknown, were retained in denominators but are not shown; therefore, displayed categories do not sum to 100%.
