

Supplementary Fig.1

Association of CSF Total PKR (PKR), CSF Phosphorylated PKR and CSF Phosphorylated PKR/ Total PKR ratio with Tau protein and Tau phosphorylated at serine 181 in our cohort.

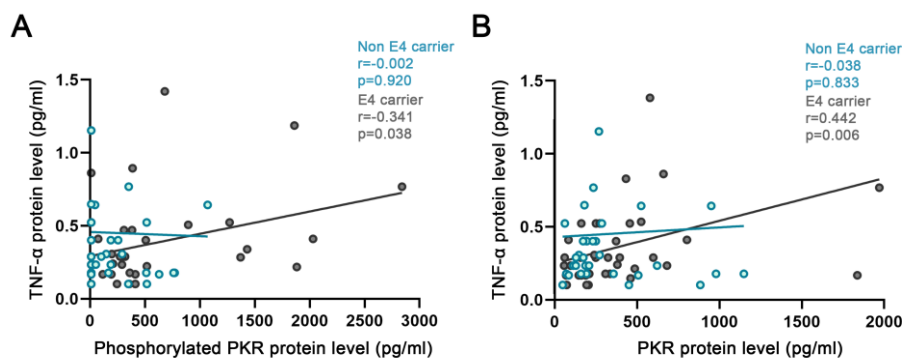

The association between biomarkers was studied using linear regression, adjusting for age and sex.

Supplementary Fig.2

Association of CSF Phosphorylated PKR levels and CSF Phosphorylated PKR/ Total PKR ratio with Neurogranin, VILIP1 and YKL-40 in our cohort.

The association between biomarkers was studied using linear regression, adjusting for age and sex.

Supplementary Fig.3

Impact of APOE4 status on the association of CSF phosphorylated PKR levels and total PKR with CSF TNF-α protein level.
